

## Impact of Row Duplication on LnCVR: Large Sample (250/trial arm)

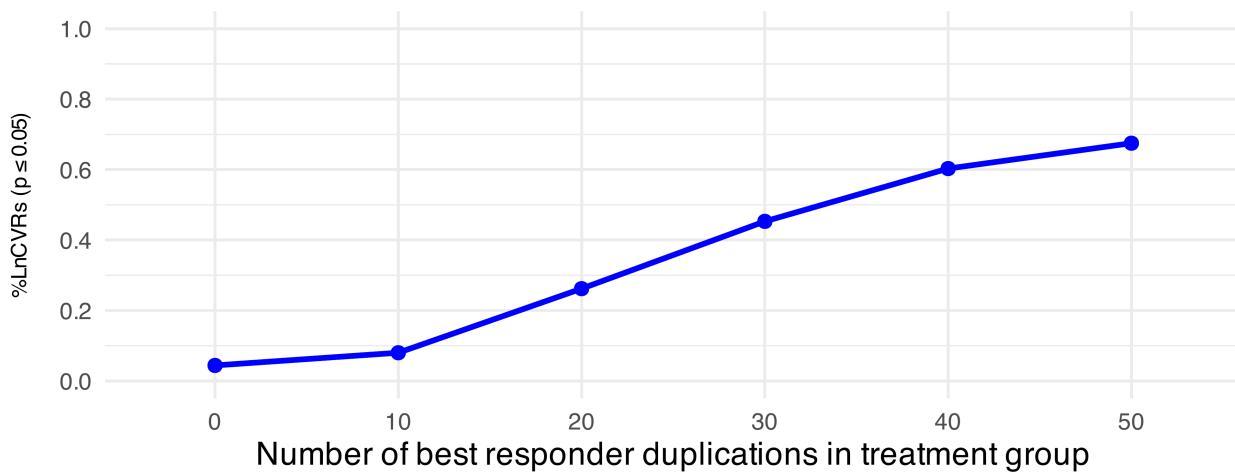

Impact on LnCVR, % significant LnCVR, and % significant LnCVR outliers

### Best responders (smallest HbA1c post-treatment) duplicated

Significance ● Not Significant ● Significant

### %LnCVRs ( $p \leq 0.05$ ) by Row Duplication Level

### %LnCVRs ( $p \leq 0.05 \text{ & } > 3\text{-sigma}$ ) by Row Duplication Level
